

ENTERPRISE AWARD

Tired of watching virtual events through a computer screen? Shut it down! There's a better way. Follow the instructions below to watch on your Smart TV.

1. CHROMECAST OR AIR PLAY

If you have a Google Chromecast or Apple TV, simply navigate to the event URL on your phone, and click the cast or Air Play button. No need to download a web browsing app!

2. DOWNLOAD A WEB BROWSING APP

If you don't have a Chromecast or Apple TV, download a web browser app. While many Smart TVs come with a built-in web browsers, some may not, and there are a couple options available for you to download:

- Mozilla Firefox
- **Puffin TV Browser** (recommended)

*Please note, if the event is being hosted on YouTube, just download the YouTube app on your Smart TV. Often times your Smart TV has the YouTube app installed on it right out of the box. Simply search your apps to see if you already have it. Downloading a web browser app is not necessary.

3. ENTER THE EVENT'S URL

Enter the event's URL into the browser's search bar. Once the event page has loaded, use your cursor to navigate to the video player. Click the full screen icon located at the bottom right corner of the video player. Then, press play and enjoy!
